☐ Industry EPD
☒ Product EPD

Declared product
1 pcs. Centrum Rock Shoe for mounting on foundation piles

Number of declared data sets/product variations: 6
CPRP 235-25 & CPRP 235-50
CPRP 250-50
CPRP 270-25-60 & CPRP 270-50-60
CPRP 300-50-60
CPRP 350-50
CPRP 400-50

Number of additions: 1
Upgrade from Type '-60' to Type '-70'

Production location
Centrum Pæle's supplier and partner ECM Industries in Kolding.

Use of the product
Rock shoes for casting in foundation piles for foundation on mountain and rough terrain.

Declared/functional unit
Declared unit is 1 piece of rock shoe.

Reference year
2020

Issued
10-03-2021

Valid until:
10-03-2026

Basis of calculation
This EPD is developed in accordance with the European standard EN 15804+A2.

Comparability
EPDs of construction products may not be comparable if they do not comply with the requirements in EN 15804. EPD data may not be comparable if the datasets used are not developed in accordance with EN 15804 and if the background systems are not based on the same database.

Validity
This EPD has been verified in accordance with ISO 14025 and is valid for 5 years from the date of issue.

Use
The intended use of an EPD is to communicate scientifically based environmental information for construction products, for the purpose of assessing the environmental performance of buildings.

EPD type
☐Cradle-to-gate
☒Cradle-to-gate with options
☐Cradle-to-grave

CEN standard EN 15804 serves as the core PCR

Independent verification of the declaration and data, according to EN ISO 14025

Product information

Product description

The main materials of the product are listed in the table below. These represent 100% (w/w) of the declared product.

Material	CPRP 235-25 & CPRP 235-50	CPRP 250-50	CPRP 270-25-60 & CPRP 270-50-60	CPRP 300-50-60	CPRP 350-50	CPRP 400-50	Type -60 to type -70
Rebar	33%	32%	25%	24%	12%	12%	0.00E+00kg
Steel plate	50%	51%	62%	63%	79%	80%	-4.60E-01kg
Hardened tip	18%	17%	13%	13%	9%	8%	1.07E+00kg
Weight	1.72E+01kg	1.76E+01kg	2.27E+01kg	2.35E+01kg	4.69E+01kg	4.84E+01kg	6.10E-01kg

Representativeness

The declared unit is 1 piece of rock shoe for installation on foundation piles in concrete.

Data for the underlying LCA are based on annual averages for mountain shoe production in the year 2020. Background data is based on the GaBi database version 2020.2. Most data is less than 5 years old, and all data is less than 10 years old in accordance with EN15804:2012+A2:2019.

Content of dangerous substances

The product does not contain substances from the REACH Candidate List, the "Candidate List of Substances of Very High Concern for Authorisation", in concentrations which exceeds 0.1%.
(http://echa.europa.eu/candidate-list-table).

Essential properties (CE)

Rock shoes comply with the requirements of DS-EN 12794.
Performance declarations on the individual rock shoe can be found here:
https://www.centrumpaele.dk/bjergsko.aspx

Life expectancy (RSL)

The life expectancy is the same as the foundation piles where couplings are mounted. The service life is therefore counted as 100 years (RSL) within the time being determined in accordance with Article 100(1) of the Basic Regulation. Annex AA in "DS/EN 16757:2017 – "Sustainability in construction – environmental product declarations – Product category rules for concrete and concrete elements".

LCA background

Declared unit

LCI and LCIA results in this EPD relate to the declared unit 1 pcs. mountain shoe, indicated in the table below, with the conversion factor to 1 kg.

Name	CPRP 235-25 & CPRP 235-50	CPRP 250-50	CPRP 270-25-60 & CPRP 270-50-60	CPRP 300-50-60	CPRP 350-50	CPRP 400-50	Type -60 to type -70
Declared unit	1 pcs.	1 pcs.	1 pcs.	1 pcs.	1 pcs.	1 pcs.	1 change
Mass, kg	17.2	17.6	22.7	23.5	46.9	48.4	0.6
Conversion to 1 kg	0.0581	0.0568	0.0441	0.0426	0.0213	0.0206	1.6393

Functional unit

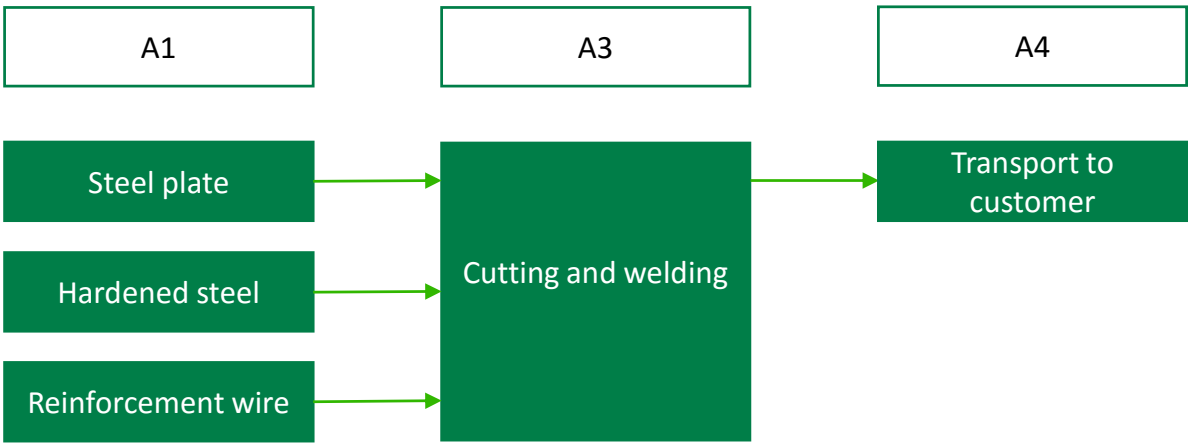
Not defined.

PCR

This environmental product declaration is based on the requirements of EN 15804:2012+A2:2019 and the product-specific PCR: "DS/EN 16757:2017 – "Sustainability in construction and construction – environmental product declarations – Product category rules for concrete and concrete elements".

Flow diagram

The flow diagram below covers raw materials (A1), production (A3), and outbound transport (A4). Inbound and internal transport (A2) takes place at the arrows.



System boundaries
The EPD is based on cradle-to-gate with options, module C1-C4 and module D. Options consist of including of module A4.

All relevant processes from the modules covered are included.

The use phases (B2-B7) are of no relevance to the EPD as no contribution occurs as long as the product is installed in a given building/ construction according to applicable instructions and standards.

The general rules for omitting inputs and outputs in the LCA follow the provisions of EN 15804:2012+A2:2019, 6.3.5, where the total omission of input flow per module may not exceed 5% of energy consumption and mass and a maximum of 1% per unit process.

Key assumptions are described for each life cycle stage below.

The product phase (A1-A3):
The product phase includes the provision of all raw materials, products and energy, transport to production, internal transport and waste treatment up to end-of-waste or final disposal.

The LCA results are indicated in aggregated form of the product phase, which means that modules A1, A2 and A3 are considered as a single module A1-A3.

The supplied steel plates are cut into shape and welded together.

Construction process phase (A4-A5):
The construction process phase includes transport from the factory gate to the construction site (by truck).

The rock shoe is inserted into the concrete pile at the factory and is thus part of the pile when installed on a construction site.

Use phase (B1-B7):
Once mountain shoes mounted on foundation piles are installed in buildings or installations, according to applicable instructions and standards, maintenance, repairs, replacements or renovations will not be required under normal conditions of use. Likewise, there is no energy or water consumption associated with the product during the use phase.

End of life (C1-C4) and potential for recycling, recycling and energy recovery (D):
The C and D modules are rated MNR as it is considered that there is no excavation of foundation piles in concrete with associated elements such as joints and rock shoes. All materials are inert in buried condition, and it will be associated with high energy consumption to excavate the elements. In addition, it is rare for built-up areas to be returned to natural condition, as these areas are usually redeveloped. When rebuilding, foundation piles can be included in the new construction if they are not damaged during demolition and data on the piles is known.

In this EPD, the piles are not considered recycled. Foundation piles left in the ground are specifically mentioned as examples in the PCR EN 16757:2017, chapter 6.3.8.4.2: "The EPD may specify a scenario whether no deconstruction/demolition or disposal takes place (e.g. disused underground foundation piles left without being exhumed)".

LCA results

For the calculation of LCIA results, the characterization model CML 2001 is used with GaBi 10.0 with database version 2020.0 for classifying and characterizing input and output flows.

Module A4 is indicated per kg of product per 100 km of transport. The results should therefore be multiplied by the weight of the product, as well as the distance relative to 100km. Thus, for a product of 10 kg transported 200 km, all results must be multiplied by 10 x 2 = 20.

The results are given first for the main products and then for the change "Type -60 to type -70". If this change is made, the results for this must be added to results for the main product.

LCA results

Disclaimers	[1] The results of this environmental indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator.									
	[2] This impact category deals mainly with the contingent impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

Additional information

Technical information on underlying scenarios

On-site transport (A4)

Name	Value	Unit
Fuel quantity and type (alternatively: type of transport)	Diesel	-
Transport types	*Truck trailer, Euro 6, 28 - 34t gross weight / 22t payload capacity*	
Transport distance	100	km
Capacity utilisation (including empty return journey)	61	%
Gross mass of transported product	17,2 – 48,4	kg/pcs.
Capacity utilisation, volume factor	1	-

Reference service life

Name		Unit
Reference Service Life - Lifetime RSL	100	Year
Declared product characteristics (at port) etc.	https://www.centrumpaele.dk/bjergsko.aspx	-
Instructions for use (if given by the manufacturer)	https://www.centrumpaele.dk/statiske-beregninger.aspx	-
Presumed quality of installation work, according to manufacturer instructions	https://www.centrumpaele.dk/statiske-beregninger.aspx	-
Outdoor environment (outdoor use) – e.g. weather resistance, wind, pollution, UV, etc.	https://www.centrumpaele.dk/bjergsko.aspx	-
Indoor environment (indoor use), e.g. temperature, humidity, etc.	*Not applicable*	-
Conditions of use - e.g. mechanical influences, frequency of use, etc.	https://betonhaandbogen.dk/forside	-
Maintain (frequency, type, quality, parts replacement)	*Not applicable*	-

End of life/Disposal (C1-C4)

Name	Value	Unit
Sorted construction waste	0	kg
Mixed construction waste	0	kg
For reuse	0	kg
For recycling	0	kg
For energy recovery	0	kg
For landfill	0	kg
Prerequisites for end-of-life scenarios	-	-

Recycling, recycling and/or recycling potential (D)

Name	Value	Unit
Displaced material	0	kg
Recycling potential	0	kg

Indoor air

Not applicable.

Soil and water

The EPD does not indicate anything about the release of hazardous substances to soil and water, as the horizontal standards for measuring the release of regulated hazardous substances from construction products using harmonised testing methods under the provisions of the respective Technical Committees for European Product Standards are not available.
